- Bootstrap

ACADEMIC BACKGROUND

Career Foundry
Full-Stack Web Development 2021

Pima Medical Institute
Bachelor of Science 2015

Pima Medical Institute
Associate's Degree 2012

DEVELOPMENT PROJECTS

Full-Stack Movies Application 2021

Built a RESTful API and database containing information about various movies with the front-end created using Angular. The app allows users to create an account, view a list of all movies in the database, get information about a single movie, genre, or director, as well as add/remove movies from a favorites list.

Utilized technologies including Node.js, Express, MongoDB, Mongoose, Angular, and Angular Material to create app functionality and a uniform user interface.

React Native Chat Application 2021

Built a simple, real-time chat application for Android and iOS in order to allow users to chat, share images, location data in a map view, and view messages offline. The app utilizes anonymous user authentication via Google Firebase and message data is stored in a Google Firestore Database.

Utilized additional technologies including React Native, Expo, and Gifted Chat to develop and test app functionality and create a pleasing user experience.

WORK HISTORY

Customer Success Specialist

Validity, Inc., Sept. 2019 - April 2020

- Guided new customers through a detailed onboarding process and provided education necessary to ensure successful utilization of purchased tools
- Hosted training webinars and fielded a variety of client questions related to product adoption
